

INSTALLATION GUIDE

PERFORMANCE PLASTERBOARD

Breathaplasta Universal is ideal as a healthy skim coat applied to specialist gypsum plasterboard with the use of a primer. Breathaplasta Universal is a quick and easy lime plaster. It's simple to use and sets within an hour.

Important notes for use on plasterboard:

- Specialist plasterboard requires a primer to be used before plastering. Examples include: moisture resistant (green), fire resistant (pink), and acoustic (blue).
- Conventional gypsum plasterboard (ivory coloured paper) does not require a primer.

Mix

Water required

Add 1 x 20kg bag of Breathaplasta to approx. 10 litres of clean water.

Mix Time

Mix the plaster using a paddle mix for approx. 3 minutes.

Apply

Primer

Apply a primer to prepare the surface of the plasterboard.

Apply

Two coats

Apply at least 2 coats of Universal. Each coat should be approx. 2mm thick.

Set

Setting time

Setting time per coat of Universal is approx. 45-60 minutes.

Finish

Use clean trowel

Run a clean trowel over the surface of the plaster for a smooth finish. Use a sponge float for more textured finishes.

Equipment Required:

Breathaplasta Universal, clean water, brush or mister, hawk, trowel and plastering tools.

Surface preparation:

Primer (bonding agent) is required when plastering onto specialist plasterboards.

Recommended plaster thickness:

Approx. 4mm total thickness.

Recommended plaster application:

1. Base coat of Universal 2mm.
2. Top coat of Universal 2mm.
3. For a smooth finish, moisten the surface of the plaster with a fine mist spray bottle to help polish the surface with trowel.

Coverage per 20kg Universal bag:

Approx. 5m² at 4mm thickness

Setting time per coat:

Approx. 45 - 60 minutes
